

Strategic Investment Roadmap

Prepared for **Charles Christensen**

Maximizing ROI in the King County Housing Market

The Strategic Foundation

Timing Alpha

Exploiting seasonal price variance to buy at local minima and exit at peak liquidity.

Structural ROI

Targeting specific construction “Grades” to unlock exponential valuation jumps.

Geo Precision

Identifying high-yield zip codes and premium border spillover opportunities.

Data Driven

Leveraging correlations from 21,500+ records to eliminate investment guesswork.

DEEP DIVE

Market Landscape

Strategic Timing - Price Optimization

❄️ **The Price Floor:** February drops to an absolute low of **\$508,520**.

☀️ **The Spring Peak:** April spikes aggressively to an average of **\$562,216**.

🕒 **Built-in Equity:** Shifting buy timing to winter captures a **~\$53,000 (10.5%) organic gain** before lifting a hammer.

Market Velocity - Volume & Liquidity

- ❄️ **Winter Bottleneck:** January volume bottoms at **978 sales** (High negotiation leverage).
- ☀️ **Spring Surge:** May transaction volume explodes by **146%** to **2,414 sales**.
- ✂️ **Exit Window:** Listing in **May/June** minimizes holding costs and maximizes multi-offer potential.

Structural ROI - Value Scaling by Grade

The Grade Threshold:

Properties **graded 7-8** represent the standard market average baseline.

Exponential Growth:

Grade 7 to 9 triggers a massive valuation jump of **over \$345,000**.

Strategic Focus: Target "average" Grade 7 homes to renovate and re-engineered into **higher-tier Grade 9** quality.

Property Valuation Scales Exponentially by Grade

Defining Custom Quality: The Execution Standard

 **Architectural Intent:** Grade 9 moves beyond mass-market plans to custom layouts tailored to lot **topography** and **light**.

 **Premium Infrastructure:** Capital is deployed into **ceiling plates (9 to 10+ feet)**, vaulted framing and premium structural roof lines.

 **Refined Interiors:** Focus on solid-core doors, **natural stone** surfaces and bespoke **cabinetry** to justify the luxury exit valuation.

Investment Decision Matrix - Targeting the Margin

GRADE TIER	MARKET CONTEXT	MEDIAN VALUE	STRATEGY ACTION
Grade 6	Sub-standard Rental Grade	\$310,000	AVOID
Grade 7	Standard Market Baseline	\$375,000	PRIMARY ACQUISITION
Grade 8	Mid-tier Residential	\$510,000	HOLD/SECONDARY
Grade 9	High-Tier Custom Finish	\$720,000	PRIMARY EXIT OBJECTIVE
Grade 10+	Ultra-Luxury Estate	\$1,120,000	AVOID(HIGH RISK)

Geospatial Opportunity: Top Zip Codes for Grade 9 ROI

Premium Exit Zones: Funnel finished Grade 9 assets into elite enclaves (**98004 / 98039**) where luxury buyers pay maximum premium.

98039

\$1.71M

98004

\$1.39M

Capital Protection: Funneling completed assets into these **high-ceiling micro-markets** protects our margins against unexpected renovation cost overruns.

98112

\$1.30M

98105

\$1.23M

The Neighborhood Multiplier: Upgrading to Grade 9 in top **school districts** captures a **+14% velocity premium**, cutting holding times in half.

98040

\$0.99M

The Science of Value - Primary Drivers

Highest Correlation

0.70 / 0.67

📈 The math is clear: **Living Area** and **Structural Grade** hold the only high predictive power for market pricing.

🎯 The **Structural Filter**: Features like Bedrooms and Condition are secondary. Our capital must focus strictly on **Structural Upgrades**.

Correlation Matrix of Housing Features vs. Price

Next Steps?

Ready to deploy capital, Charles.
